BULLETIN ON CURRENT LITERATURE

The publications listed in this issue have been received by the library of the National Society for Crippled Children and Adults and are available for loan. The library does not stock copies for sale. Prices are listed so that orders may be addressed directly to the publishers.

Because the library frequently has only one copy of an item, and because of the great number of requests, it is suggested that the resources of local libraries be investigated first. The library is maintained by the National Society for the use of its staff, for the state and local member societies, and for others whose local resources are so limited as to make the material otherwise unavailable.

The National Society attempts to maintain as complete a collection as possible on all subjects of interest to workers with the handicapped. Besides lending specific books, pamphlets, or magazine articles, the library will assemble and send materials on any specific subject. Loan material is sent postpaid.

The National Society for Crippled Children and Adults is a nationwide organization with headquarters in Chicago and more than 2000 member state and local societies for the crippled and handicapped throughout the country. Its many projects and services are directed and supervised by professionally trained specialists. The Society provides services in health, welfare, education, recreation and employment to all types of handicapped persons. All services of the Society are established and carried out in a manner to supplement and extend and not to duplicate or compete with the services of any other agency public or private, national, state or local. The National Society is supported by the annual sale of Easter Seals.
